## HIT THE SPOT WITH HINKLEY'S NEW MODULAR INTEGRATED LED ENGINE INSERT

January 27, 2014 – Cleveland, Ohio – This cutting-edge modular integrated LED engine insert brings tuning ease to the industry. It simply drops into Hinkley's popular 1536MZ (cast brass) and 1536BZ (aluminum) spot light the same as a lamp. It is designed to spread the heat from the LED and integrated driver into the fixture, overcoming the thermal issues associated with LED MR16 lamps. Three engine inserts are available, one each for 20/35/50W equivalency. Beam spread is field changeable via an easy-to-remove and insert optic assembly.

Hinkley's 1536 is now the only spot light you need. It will support any lamping alternative, whether incandescent or LED MR16 or integrated. With the new modular integrated LED engine insert, Hinkley has created the ultimate solution for project affordability and flexibility and future proofs the fixture for an upgrade to more efficient, higher quality light sources.

Located in Cleveland, Ohio, Hinkley Lighting has been a leading manufacturer and distributor of high-quality lighting fixtures for over 90 years and is driven by a passion to create lighting that blends design and function while enhancing the lifestyles of their customers.
